PROFESSIONAL SUMMARY

Engineering Manager with 16+ years of experience transforming complex healthcare needs into dependable software products. Combines deep domain understanding with pragmatic leadership to guide initiatives from early concept through modernization and sustained growth. Trusted to bring clarity to ambiguous challenges, align engineering execution with customer and business priorities, and create an environment where teams take ownership and deliver with confidence. Recognized for thoughtful decision-making, calm leadership, and a long-term approach to product quality, organizational capability, and customer value.

CORE COMPETENCIES

LEADERSHIP AND DELIVERY - Engineering and cross-functional team leadership - Technical strategy and roadmap execution - Agile delivery, risk management, and KPIs - Stakeholder management and mentoring	ARCHITECTURE AND CLOUD - System design, microservices, and modular monoliths - Clean Architecture and CQRS - Event-driven architecture, Pub/Sub, and REST APIs - Cloud architecture, DevOps, and database scalability
AI AND PRODUCT ENGINEERING - AI-assisted engineering and AI-enabled products - AI-driven SDLC/ADLC and Generative AI - AI-powered chatbots and agentic workflows - Product modernization and delivery	HEALTHCARE AND TECHNOLOGIES - Healthcare SaaS, EHR/EMR, eMAR, and medical billing - Scheduling and workforce management .NET, C#, Angular, React, React Native, and Node.js - Ruby on Rails, AWS, Lambda, DynamoDB, SQL, and MySQL

PROFESSIONAL EXPERIENCE

Engineering Manager | iCareManager

Lahore, Pakistan | Aug 2022 - Present

- Lead four cross-functional product teams responsible for healthcare capabilities spanning EHR/EMR, eMAR, staff time and attendance, shift scheduling, appointments, training, events, provider management, and medical billing.
- Own technical strategy, architecture, delivery planning, engineering quality, and modernization initiatives across multiple healthcare SaaS products.
- Directed modernization of the legacy eMAR platform, migrating legacy functionality to modern technologies and microservices to improve reliability, scalability, and operational efficiency.
- Modernized Staff Time and Attendance using Clean Architecture and Pub/Sub patterns to reduce coupling and improve maintainability.
- Scaled legacy data workflows by applying CQRS and re-architected monolithic solutions toward a modular monolith design.
- Apply AI-assisted engineering practices across requirements analysis, solution design, development, testing, code review, and technical documentation, while evaluating AI-enabled product features and agentic workflows.

Staff Engineer | iCareManager

Lahore, Pakistan | Mar 2018 - Aug 2022

- Designed and delivered EHR and eMAR web applications using AngularJS and Angular.
- Built a serverless messaging and commenting microservice using AWS Lambda and DynamoDB.
- Developed iOS and Android applications for EHR, eMAR, and American train schedules using React Native.
- Developed an Apple Watch application for American train schedules.
- Applied scalable architecture and maintainability practices across web, mobile, and cloud solutions.

Principal Software Engineer | Credibal

Lahore, Pakistan | May 2015 - Mar 2018

- Developed a donation management platform for a nonprofit organization, including donor engagement, campaign management, contribution tracking, and impact reporting.
- Built a donor self-service portal for reviewing donation history and organizational spending.
- Delivered full-stack features using Ruby on Rails and Angular and applied Clean Architecture principles to improve scalability and maintainability.
- Managed deployments across development, QA, and production environments.

Senior Software Engineer - Team Lead | Hashe Computer Solutions

Lahore, Pakistan | 2014 - 2015

- Designed and delivered an MVP for a freight management platform with a vendor communication chatbot, fintech module, and bidding system using PHP and Angular.
- Developed a nearby-business discovery platform that enabled provider registration and local service search.
- Built a scheduling mobile application using the Ionic framework for appointment and task management.

Senior Software Engineer | Fortsolution

Lahore, Pakistan | 2011 - 2014

- Developed mobile and vehicle tracking applications with real-time monitoring capabilities.
- Engineered and maintained software using PHP, Angular, Ruby on Rails, Node.js, and JavaScript.
- Designed an interactive iPad storybook application and led developers to deliver a major project on time and within budget.

Software Engineer | ApniMarket.pk

Lahore, Pakistan | 2010 - 2011

- Developed web applications using PHP, JavaScript, HTML, CSS, and WordPress.

EDUCATION

Master of Computer Science | Bahauddin Zakariya University, Multan | Aug 2008 - May 2010

Bachelor's Degree - Mathematics and Physics | Government Degree College, Burewala | 2006 - 2008

PROFESSIONAL DEVELOPMENT

Project Management Program | LUMX | Mar 2025 - May 2025
