

MUHAMMAD WASIM ARSHAD

Manager, Software Engineering

Lahore, Pakistan • +92 345 7155505 • choudharywasim@gmail.com • imwasim.com • linkedin.com/in/wasim-arshad-software-architect

PROFESSIONAL SUMMARY

AI Solution Architect and Engineering Leader with 16+ years of experience building and modernizing healthcare SaaS products. Leads four cross-functional teams across EHR/EMR, eMAR, workforce management, scheduling, provider management, and medical billing. Combines agentic AI, scalable architecture, cloud delivery, and hands-on engineering to turn complex healthcare requirements into dependable products that scale.

CORE SKILLS

AI SDLC • Agentic Development • AI-Assisted Development • MCP Development • Technical Project Management • Team Leadership • System Design • Agile Methodologies • .NET/C# • Node.js • Ruby on Rails • PHP • Python • Angular/React/React Native • SQL/MySQL • AWS (Lambda, DynamoDB) • CQRS • Microservices • Clean Architecture • DevOps/CI-CD

KEY ACCOMPLISHMENTS

- Led modernization of core EHR portfolio (eMAR, EMR, Scheduling, Payroll, LMS, Appointments, Medical Billing), migrating 100% of legacy eMAR code to microservices and improving reliability/efficiency by ~90%.
- Revamped existing modules using AI-assisted development practices, accelerating delivery and improving code quality across the EHR product portfolio.
- Built new modules powered by AI agentic workflows, including a medication-passing companionship assistant and an agentic medical billing workflow.
- Currently leading adoption of an Agentic Software Development Life Cycle (Agentic SDLC) across engineering teams to embed AI agents throughout planning, development, and QA.
- Re-architected a legacy monolith into a modular architecture using CQRS and pub/sub patterns (+50% maintainability); designed a serverless messaging microservice (AWS Lambda + DynamoDB) and launched cross-platform iOS/Android and Apple Watch apps with React Native.

WORK EXPERIENCE

Manager, Software Engineering — iCareManager, Lahore

Aug 2022 – Present

- Lead development across Staff Time & Attendance, Shift Scheduler, eMAR, EMR, Appointments, Training, Events, Provider Management, and Medical Billing modules.
- Refactored Staff Time & Attendance using pub/sub and clean architecture, improving maintainability by 50%.
- Scaled the legacy database via CQRS and re-architected the solution to a modular monolith.

Solution Architect — iCareManager

Mar 2018 – Aug 2022

- Built EHR front-end (AngularJS/Angular) and a messaging/commenting microservice (AWS Lambda, DynamoDB).
- Built iOS/Android and Apple Watch apps (React Native); implemented clean architecture at Credibal.com.

Principal Software Engineer — Credibal

May 2015 – Mar 2018

- Built a donation management platform (Ruby on Rails, Angular) with donor portal and impact reporting.
- Managed deployments across Development, QA, and Production environments.

Sr. Software Engineer – Team Lead — Hashe Computer Solutions

2014 – 2015

- Delivered a freight management MVP (chatbot, fintech module, bidding system) using PHP and Angular; built a business-discovery web app and an Ionic scheduling app.

Sr. Software Engineer — Fortsolution

2011 – 2014

- Built mobile/vehicle tracking apps and an interactive iPad storybook app; led a team delivering a major project on time and within budget (PHP, Angular, Ruby on Rails, Node.js).

Software Engineer — ApniMarket.pk

2010 – 2011

- Developed web applications using PHP, JavaScript, HTML, CSS, and WordPress.

EDUCATION

Master of Computer Science — Bahaudin Zakariya University, Multan (2008–2010)

Bachelor's (Double Mathematics and Physics) — Govt. Degree College, Burewala (2006–2008)

Certification: Project Management — Lumx (Mar–May 2025)
